

Expedite your horticultural lighting product application.

Get your hort applications reviewed faster.*

The DLC is offering a limited time option to expedite your horticultural application review.

Expedited Review Timeframes:

App Type	Initial	Comprehensive
Level 1	9 4 days	7 3 days
Level 2	9 4 days	10 5 days
Priv. Label	-	12 6 days
Update	9 4 days	10 5 days

Considerations:

- Review timeframes not included above are similarly halved. Details can be found on the [Review Timeframes](#) page and [Listing Fees](#) page.
- The expedite fee is paid at the time of typical application invoicing.
- Expedited applications are held to the same requirements as non-expedited applications.

*For most applications, the majority of the review time is due to lack of clarity in product configuration, performance, or specification sheets, and/or incomplete and inaccurate information provided by the submitter. Providing accurate and complete materials is critical for meeting review timeframes.

How to Enroll

Select the “expedite” option in the questionnaire within the application portal.

Pricing

\$1,650 per expedited application.

(The DLC will institute consequences if manufacturers request expedite but refuse to pay upon receipt of invoice.)
